

The Leader in Reach Truck Innovation

The FBRF Series

Excellent standard features

Reach trucks must meet three basic criteria: fast travel, high lift capability and compact design. The new FBRF series clearly excels at all three.

Self-diagnosis

capabilities. By integrating the travel, hydraulic, and electric power steering

intelligence optimizes the operator's

functions, the system's advanced

interaction with the forklift.

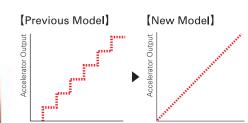

Powerful acceleration for increased work efficiency

Our unique SICOS-AC system provides optimal control of the FBRF's powerful travel and hydraulic AC motors. The result is highly efficient driving, lifting and turning.

This graph compares the acceleration time and control capabilities of a superceded model and a new model

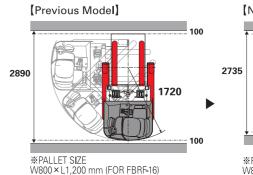

Tight Functional tight turning ability

Excellent maneuverability for narrow spaces

By completely redesigning the frame, we've reduced the minimum turning radius and right angle stacking aisle width. As a joint result with newly adopted 360° endless steering, we now lead the industry in space efficiency.

At the same time, we've created a more spacious and comfortable operating compartment.

MIN. TURNING RADIUS / PRACTICAL RIGHT ANGLE STACKING AISLE WIDTH (mm)

[New Model]

**PALLET SIZE W800 × L1,200 mm (FOR FBRF-16)

Stable ifting

Dependable stability

Smooth, powerful lifting

We've re-designed chassis and increased mast rigidity to ensure excellent stability even during high lifts. The result is stable load handling at up to seven-meter heights without capacity reduction.*

The tiltable integral sideshifter, provided as standard equipment, improves the efficiency of high loading work.

*when equipped with large batteries

Improved visibility

For safer, easier operation

We've improved the operator's forward field of view by mounting the free lift cylinder diagonally and off-center. What's more, we've carefully designed the overhead guard to avoid blocking the operator's overhead view. These innovations ensure significantly increased work efficiency.

Shock absorption mast and soft landing mechanism

A shock absorption function for the mast relieves any shock occuring from friction while lifting. The speed at which the forks are lowered is reduced just before the forks reach the ground, eliminating any shock. These functions prevent the loads from damage by vibration.

- Traveling speed
 - Battery discharge status Operating hours

■ Current time

Advanced steering and multi-display

Steer-by-wire with 360° endless steering makes switchback unnecessary. And our speed-sensitive electric power steering (EPS) is easier than ever.

What's more, machine status information is put up on the multidisplay mounted on steering panel for

Wheel indicator

The wheel indicator on the display instantly shows the direction of truck movement.

Self-diagnosis function

SICOS-AC diagnoses any malfunctions and displays the results with graphics.

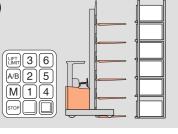

Driving mode setting

To accommodate site conditions and the operator's experience level, the operator can set the maximum speed and acceleration feeling on the display.

AOS semi-auto stacking system (Optional)

Once you've entered the heights of your racks into the system memory, the AOS semi-auto stacking system raises the forks to that height at the touch of a button. This feature is a great advantage for loading/unloading your most commonly used racks as well as high racks that are difficult to see.*

*Operator must visually confirm fork position before loading/unloading.

NICHIYU

Comfortable operation for enhanced ease-of-use

Totally redesigned operating compartment

Our completely redesigned operating compartment features several ergonomic innovations. the tilt-mounted fingertip levers and large armrests greatly reduce arm fatigue. The operator can finely adjust the both of steering panel position and seat position. We've included these advanced features as standard to ensure maximum comfort.

Nichiyu trucks a reliable work partner. Travel-speed-sensitive

This innovation automatically slows lift speed and rotation when travel exceeds a set speed. It's an advanced safety feature that helps to prevent accidents.

is left idle for 15 minutes.

Automatic power-off

To prevent wasteful power

consumption, the power is

The Neutral Safety Feature prevents the truck from moving suddenly if the keyswitch is turned on while the accelerator is depressed or during operation of the hydraulic lever. For preventing accidents caused by misoperation, it issues a warning display and buzzer.

automatically shut off when the truck

Operation interlock system(OIS)

If the operator is not seated correctly for more than two seconds, traveling and hydraulic operations are interlocked.

Fully opening drive unit cover

The drive unit cover under the operator's seat can be fully opened, providing more convenient access and easier maintenance.

Battery forward pull-out system

Thanks to our convenient mast reachout feature, the battery can be pulled out toward the front. This greatly simplifies battery refilling and

monitoring of battery electrolyte levels. It also eliminates the need for a battery table.

*To accommodate customers who frequently change batteries, the side roll-out type is also available.

Cold storage applications

These water-resistant, moisture-resistant and rustresistant trucks are designed to operate at the low temperatures typically found in industrial freezers.

About us

Nichiyu is a pioneering developer of electric forklifts in Japan. Since introducing the country's first electric forklift in 1937, Nichiyu has continued to introduce a variety of innovative electric forklift solutions. We take pride in our ability to provide customer-focused products and exceptional service.

Committed to comprehensive service

We maintain highly trained service staff in every country in which we sell our products. Should you require regular periodic maintenance or emergency repair, simply contact us for fast and efficient on-site service. We take pride in our commitment to first-rate support and unmatched customer service.

All specifications have been determined according to manufacturer's terms and conditions. Specifications are subject to change without notice in the interests of product improvement.
